

MAXFIELD'S GARDEN PLANNER

"It's better to work smart than to work hard."

The best gardens are made from the best plans.

TIME REQUIRED:
APPROXIMATELY 15 MINUTES

TOOLS REQUIRED:
PEN AND PAPER

WHEN (Write these dates and times down in your calendar if that helps)

When will I start working in my garden / farm?

When will I start my seeds / plant my seedlings?

Which days of the week can I dedicate to working in my garden / farm?

When will I harvest each crop?

WHERE

What part of my home will I dedicate to growing food?

Will I be growing in the ground, raised beds, or containers?

Does this location have enough space, easy access to sunlight and water?

Is it close to my kitchen (what should be closest to my kitchen, what will I be harvesting most frequently)?

MAXFIELD'S GARDEN PLANNER

"It's better to work smart than to work hard."

The best gardens are made from the best plans.

WHAT

What grows well in my region / local climate?

What grows best in each month / season?

What grows well with the available space / light / water?

What are my favorite local foods to eat?

WHY

Do these foods fit within my location and time perimeters?

Do I know how to process / cook / juice the food I want to grow?

How will growing food lower my environmental impact?

Will growing these foods meet my health objectives?

HOW

What tools / resources do I need?

Do I have any help / support? (Will I need to leave town, are there any projects that are too big to do alone?)

What goals do I want to set for my garden and how will I hold myself accountable?
