

MAXFIELD'S DIY GUIDE TO SHELTERING & FEEDING MIDSEASON

“Maxfield’s Planting Mix is like the roof to your plants’ roots. It shelters roots from hot temperatures, manages water & slowly nurtures plants throughout the rest of the season”

TIME REQUIRED: 30 - 45 MINUTES

TOOLS REQUIRED: MAXFIELD'S PLANTING MIX, OVERALLS AND GLOVES ARE OPTIONAL

- Lightly broadcast Maxfield’s Planting Mix between each crop by gently sprinkling up to an inch of Planting Mix under the leaves.

- Promptly water in thoroughly.

- For larger crops and perennials, spot treat at the base of the Plant with Maxfield’s Planting Mix. Visualize the root zone for the particular crop you’re treating remembering that most plants have just as much biomass below ground as they do above.

- Water in thoroughly.

- Feed raised beds and gardens with compost tea. Check out our [video](#) and [checklist](#) on how-to make and use compost tea.

- Now get on over to our [Facebook page](#) and tell us how your plants are doing.
